

Setting Up a Chromebook

Chromebooks use Google apps and the web browser Google Chrome (), so you will need a Google Gmail account to use your Chromebook.

If you don't have a Gmail account, create one at mail.google.com.

3. Sign into your Chromebook. Enter your full Gmail address and password and click **Next**. You will see a message: *Managed by seattlecentral.edu*.

4. Set up your Chromebook account. Click **Accept and continue**.

5. Accept Google Play apps and services. Click **More** and then **Accept**.

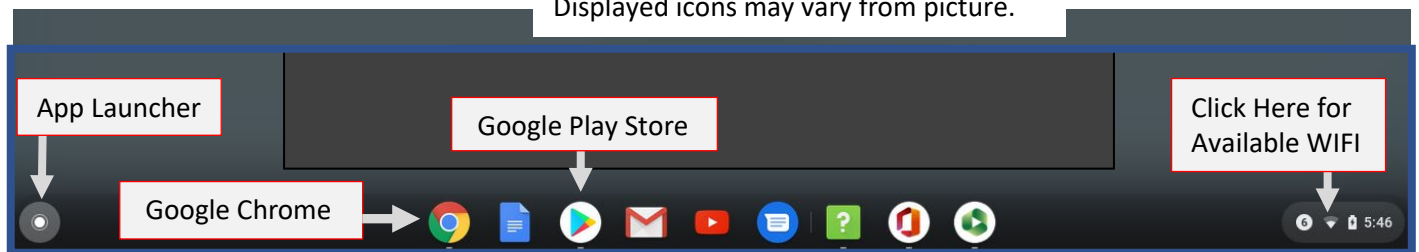

6. You can also choose to use Google Assistant. When you see **Google Assistant works here too**, choose **No thanks** or **I agree**. If you agree:

- Say, "Hey Google" to start Google Assistant. Then read the information and click **I Agree** or **No thanks**.
- Teach your Assistant to recognize your voice by following the steps. You can also click **Skip** and stop there.

7. Click *Get started*. You are ready to use your Chromebook now.

Chromebook Screen Tools

Displayed icons may vary from picture.

- The App Launcher shows you the apps on your Chromebook.
- Go to the Google Play Store to download more apps.
- Use Google Chrome to go online.
